

The Roman Catholic school at Sturgeon Landing, Saskatchewan, was destroyed by fire in September 1952. There was no loss of life. St. Boniface Historical Society Archives, Roman Catholic Archbishop of Keewatin-The Pas Fonds, N3637.

When E. A. Côté, the deputy minister responsible for Indian Affairs, met with church and school representatives to discuss the brief, he told them that only emergency repairs would be undertaken at schools that Indian Affairs intended to close.³⁵⁹

The badly built and poorly maintained schools constituted serious fire hazards. Defective firefighting equipment exacerbated the risk, and schools were fitted with inadequate and dangerous fire escapes. Lack of access to safe fire escapes led to high death tolls in fires at the Beauval and Cross Lake schools.³⁶⁰ The Truth and Reconciliation Commission of Canada has determined that at least fifty-three schools were destroyed by fire. There were at least 170 additional recorded fires. At least forty students died in residential school fires.³⁶¹ The harsh discipline and jail-like nature of life in the schools meant that many students sought to run away. To prevent this, many schools deliberately ignored government instructions in relation to fire drills and fire escapes. These were not problems only of the late nineteenth or early twentieth centuries. Well into the twentieth century, recommendations for improvements went unheeded, and dangerous and forbidden practices were widespread and entrenched. In the interests of cost containment, the Canadian government placed the lives of students and staff at risk for 130 years.

The buildings were not only fire traps. They were also incubators of disease. Rather than helping combat the tuberculosis crisis in the broader Aboriginal community, the poor condition of the schools served to intensify it. The 1906 annual report of Dr. Peter Bryce, the chief medical officer for Indian Affairs, observed that “the Indian population of Canada has a mortality rate of more than double that of the whole population, and in some provinces more than three times.” Tuberculosis was the prevalent cause of death.
